

Web Developer

Salary: up to £33,000 D.O.E.

ico Design Partners is an award-winning digital and branding agency and we're looking for a new team member.

A role has become available for a Web Developer to join us at our central London studio.

ico is a small, sociable and prolific design team with an enviable history. We create exceptional digital experiences for clients from the retail, arts, property, leisure and museum sectors. A sample of our clients includes The Science Museum, Snog Frozen Yogurt, Penguin, National Museum of Scotland, Heron International, GF Smith, to name but a few.

Our team has created, designed and developed interactive touch screen exhibits, mobile apps, websites and made some toy chickens race down a track in response to people flapping their arms.

This is a fantastic opportunity to work in a friendly and active creative environment that will push you to find innovative and smart solutions to a variety of problems. It is a chance to learn from a team who are committed to delivering award winning work across all disciplines, working alongside print and UX designers, web developers, strategists and a project management team.

What your role will involve:

We are a busy studio, so you will be working on a variety of projects at one time, at different stages of development. Your role will involve working through the full website/software development life cycle on a variety of projects, from specification and design to implementation and troubleshooting.

This will be an excellent opportunity for a talented programmer who wants an environment to test their skills and move to the next level on high-profile and challenging projects.

What we need you to have:

Experience and good working knowledge of:

PHP 5

Object-oriented programming

HTML (including HTML5)

Javascript / JQuery

CSS

Accessibility, cross-browser compliance

Ability to work with version control systems, preferably SVN

Minimum of 2-3 years experience of working in a similar environment or on relevant projects

Excellent organisational skills and the ability to independently ensure tasks are seen through to completion

A positive attitude and enthusiasm for the tasks you undertake, both independently and as part of a team

Excellent attention to detail

Current ability to work within the UK and start within 1-2 months. Preferably already living in the London area

What we'd like you to have:

Knowledge of MVC framework Yii

Ability to work with MySQL

Working knowledge of Photoshop & Illustrator

Web Developer

A degree qualification or equivalent

A personality that fits in with our friendly and dynamic office culture

A passion for design and technology that you feed by keeping up to date with the latest developments and changes, primarily in the web and mobile spaces

Experience using Mac OS X

A live portfolio of past projects

What you'll get:

A great opportunity to learn and develop your skills and experience

The support of an enthusiastic, passionate and talented team

Management that is supportive and understanding

A central London studio as your workplace

Remuneration in line with your experience

Being a small company, there is an opportunity to get involved in other tasks where time permits, so we're interested in people who have other talents and interests, such as app development, interface design or online business ideas

If you'd like to apply - this is what we need:

Please send a CV and cover letter to:
